

Saksham Singh

Java Backend Developer

Driven Java backend developer with over 2100 hours of experience mastering web development technologies, and completed multiple projects. Developed extensive skills in pair-programming, industry-standard git-flow, and daily standups to facilitate effective communication and collaborative problem-solving related to daily assignments. Regularly attending daily scrum meetings provided me with valuable insight into the daily schedule. I am ready to take on new challenges and apply my skills to exceed expectations.

- Runner-up in the Short Movie contest at **Techno Srijan, 2019 (State Level)**

Projects

Mail Application

A mail application for communication between sender and receiver.

Tech Stack: **JAVA | MySQL | RESTful WebServices | Spring Boot**

As an individual, I devoted over 4 days and 30+ hours of focused work to independently implement this project to the highest standard.

Areas of Responsibility:

- Created REST API for Mail app with secure email, registration, and login functionality.
- Utilized industry best practices and technologies.

Bus Ticket Reservation System

A CLI-based Bus Ticket Reservation System that enables easy browsing and ticket reservations for passengers.

Tech Stack: **JAVA | MySQL | JDBC**

Spent 12+ hours and 3 days to independently design and implement this project.

Areas of Responsibility:

- Enable passengers to browse bus schedules, make reservations for their journey.
- Implemented authentication inside the application.
